Alexandria, Egypt — open to remote

Profile

I'm a full-stack engineer, and most of my work is on the frontend. I care about pixel-perfect web apps and the small details that make a product feel right. I don't stop at the UI, though. I also do product engineering and backend work in Node.js, PostgreSQL and Prisma. Lately I've been building LLM-native apps.

Technical Skills

Frontend: React, Next.js (App Router, RSC, SSR/SSG/ISR), TypeScript, JavaScript, HTML, Tailwind CSS, SCSS

Backend: Node.js, Hono, PostgreSQL, Supabase, SQLite, Prisma, Docker, Trigger.dev

Design Systems & UI: Component libraries, Storybook, Figma, accessibility, responsive UI, web performance

State Management & Data: TanStack Query, Zustand, Redux, GraphQL, tRPC, REST, Zod

Quality & AI: Testing, CI/CD, feature flags, PostHog, Grafana, Sentry, BugSnag, LLM integrations, Mastra AI

Experience

Senior Frontend Engineer, Smart Bricks — Dubai, UAE (Full-time, Remote) Aug. 2025 – Present

AI platform for real-estate investing, backed by a16z speedrun.

- Lead the frontend architecture, review the team's pull requests and mentor newer engineers.
- Built the listing search, where you type what you want in plain English and the AI turns it into filters. It works across the UAE and UK markets.
- Rebuilt the valuation and score modals so investors can see why a property got its price and score.
- Moved data fetching to the server with the Next.js App Router and reworked client caching. Duplicate API calls dropped by about 30%.
- Split the property pages into separate server-rendered sections.
- Built our component library in Storybook and keep it in sync with the Figma designs.
- Set up PostHog and Grafana for funnels, feature flags and error tracking. New features now ship behind a flag.

Frontend Engineer, caisy.io — Stuttgart, Germany (Full-time, Remote) Nov. 2022 – Aug. 2025

Headless CMS.

- Moved the frontend from class components to hooks, and from styled-components to Tailwind.
- Fixed re-renders that made the content editor slow when typing or switching documents.
- Set up the Next.js, tRPC and Prisma base that later features were built on.
- Added AI content generation to the editor.

Frontend Engineer, Stake — Dubai, UAE (Part-time, Remote) Apr. 2022 – Feb. 2024

Fractional real-estate investment platform.

- Built UI for the investor-facing web app.
- Added shared components the rest of the frontend team reused.

Frontend Engineer, Independent / Upwork — Remote (Freelance) Jan. 2022 – Dec. 2023

- Built React apps and marketing sites for e-commerce and SaaS clients.
- Built component libraries with styled-components and BEM, and fixed cross-browser bugs.

Quality Analyst, _VOIS (Vodafone Intelligent Solutions)

Apr. 2019 – Dec. 2021

Customer quality on a UK telecoms account, before I moved into engineering.

- Reviewed customer calls for quality and compliance and reported to senior management.
- Handled escalated complaints and coached advisors.

Projects

ScriptBee — AI Marketing Platform

scriptbee.ai

- Built AI workflows for SEO and content generation.
- Connected about 15 third-party APIs.
- Used Mastra AI and Trigger.dev to run and retry the workflows.

Leicht — Kitchen Designer

leicht.com

- Built a multi-language kitchen configurator on a headless CMS and GraphQL.

Education

BSc Computer & Information Systems (MIS), Higher Institute of Computer and Information Systems — Abu Qir

2015 – 2020

Languages

Arabic: Native

English: Fluent (full professional proficiency)
